

Canadian Investment Grade Corporate Bond Strategy

As of June 30, 2018

Strategy description

Scotia Institutional Canadian Investment Grade Corporate Bond strategy seeks to achieve total return under a capital preservation philosophy through an actively managed and diversified portfolio of primarily investment grade Canadian corporate bonds.

The investment team maintains a well-diversified and liquid portfolio that invests in companies with the greatest potential of delivering strong risk adjusted returns. The team will seek to identify organizations that show improving fundamentals based upon independent credit analysis, while managing with a capital preservation philosophy.

Why invest?

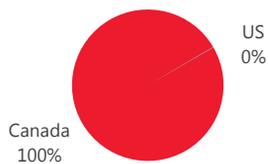

- Active management can produce superior risk adjusted returns for fixed income investors.
- Value added through security selection, driven by independent fundamental credit analysis.
- Strategy is flexible and responsive to credit market conditions, prioritizing diversified and liquid security selection.

Portfolio commentary (as of March 31, 2018)

Marc-André Gaudreau, CPA, CGA, CFA, Vice President & Portfolio Manager, Fixed Income

The year started much where it left off as continued investor complacency pushed many risk assets to all-time high valuations by the end of January. As incoming Federal Reserve Chair Jerome Powell took over from Janet Yellen in early February, volatility finally returned to markets with the VIX spiking on only his 2nd day in office on February 6th. In a painful lesson, investors in several short-volatility ETFs learned the hard way that a one-day doubling of the VIX could result in forced liquidations of their funds, many of which suffered catastrophic losses. As the quarter progressed, investors increasingly adopted a “shoot first, ask questions later” approach, keeping markets under pressure and volatility elevated. Fears of a trade-war between the U.S. and China materialized, inflation risks increased, and market darlings Facebook, Amazon, and Google sold off on user privacy-related issues and concerns over increased regulatory scrutiny. Worth noting is the increase in Libor through the quarter. Libor is used as an underlying benchmark for trillions of dollars’ worth of loans and since the end of 2017, 3-month Libor has increased more than 61bps to over 2.31%. This increase reflects higher rate expectations, capital flows, and increased T-Bill issuance to fund growing deficits. A higher Libor rate increases the cost of capital for U.S. corporations but should be more than offset by the lower tax rate regime implemented by the current U.S. administration.

The return of the Canadian Investment Grade Corporate Bond Strategy was 0.2% in the 1st quarter of the year, while its benchmark, the FTSE TMX Canada Corporate Bond Index, returned 0.28% as credit spreads were relatively unchanged during the period. The portfolio’s curve positioning favoured the belly of the curve in the 5 to 10 year area and underweight the longer 10+ maturities. This positioning was a detractor from performance as the long yields fell and outperformed the market. Security selection was also a slight detractor from performance. Top issuer contributors relative to the benchmark during the quarter included Fortis Inc, which was avoided in the strategy, while positions in Canadian Oil Sands and Bank of Nova Scotia were positive credit selections. Detractors to performance included overweight positions in Aimia, Enbridge and TransCanada Pipelines.

About Scotia Institutional

Scotia Institutional Asset Management provides progressive and innovative investment solutions to meet the challenges facing institutional clients, including pension funds, non-profits, foundations and corporations.

\$128 Billion assets under management*

Fixed Income

The Scotia Institutional Asset Management fixed income team offers a diverse set of fixed income capabilities and solutions, ranging from traditional benchmark-driven to absolute return strategies. We seek to deliver alpha over a full market cycle through the application of a capital preservation philosophy and distinctive investment processes designed to optimize the trade-off between reward and risk.

To complement the skills of our fixed income team, proprietary systems help identify, quantify and manage risks associated with the market. This combination of skills and technologies enables a proactive approach to protecting and growing our clients’ capital.
